# Your Complete Propane Portfolio, Now Even Stronger

**Now offering tank refurbishment services.**

# Comprehensive Tank Supply and Services

## Tank Refurbishment

The comprehensive process includes everything from a thorough inspection to new valves, gauges and paint.

## Reconditioned Tanks for Purchase

Reconditioned tanks are cost-effective solutions that meet all industry standards for safety and durability.

## New Tanks for Purchase

All new tanks are manufactured to our rigorous standards for reliability and safety.

## Expanded Product Line, Same Trusted Standard

Worthington Enterprises continues to deliver the products you know and trust, now expanding our offering to include new and reconditioned horizontal heating and system tanks, along with professional refurbishment services for all heating and system tanks. This builds on our established portfolio of propane cylinders, giving customers a single, trusted partner for tank supply and lifecycle support.

You can rely on consistent quality, safety, and service across every product, backed by Worthington's 70-years of manufacturing expertise and operational scale.

**That's the Worthington Advantage.**
