Maximize Your Profits

Get an Accurate Inventory in Minutes

Transform Your Inventory Management with TAGGED

Worthington Enterprises TAGGED is a sophisticated inventory management system designed with the propane marketer in mind. Using RFID technology and cloud-based software, TAGGED allows marketers to accelerate their audit process and increase accuracy by eliminating the manual process of inputting tank serial numbers by hand.

The TAGGED Package

Janam XR2 UHF RFID Reader

The Janam reader provides precise and reliable data collection for inventory management even in the most challenging environments. With advanced cellular connectivity, the Janam reader automatically connects to the strongest signal available. Each reader comes pre-programmed.

FEATURES:

- 5.7-inch LED color display
- High-capacity, rechargeable battery
- Ultra-fast RFID Reader
- Integrated 4G LTE, Wi-Fi, Bluetooth
- Ergonomically designed
- Powered by Android
- Durable design
- GPS capabilities for precise tag location data

RFID Tags

These RFID tags are tailored for steel and aluminum propane tanks, engineered to endure harsh conditions. Featuring integrated NFC and QR codes for dependable performance, they are simple to install, allowing easy upgrades in the field.

TAGGED Software

TAGGED software offers desktop and mobile applications (Android and iOS), available via subscription. Integration and customization options are also available with an Enterprise contract.
